Yoav Gur-Arieh

PhD Student researching interpretability in LLMs, with 11 years software engineering experience

Tel-Aviv, Israel | yoavgurarieh@gmail.com | yoav.ml | yoavgurarieh | yoavgur

Education

Tel-Aviv University *Dec 2025 to present*
PhD in Computer Science

Tel-Aviv University *Oct 2024 to Dec 2025*
MS in Computer Science, summa cum laude (GPA 98/100)

- Done as part of the direct-to-masters interdisciplinary program.

Tel-Aviv University *Oct 2022 to Jun 2026*
Interdisciplinary Studies (GPA 94/100)

- Studying in the Adi Lautman Interdisciplinary Program for Outstanding Students.
- Took courses in computer science, biology, neuroscience, physics and history.

Fellowships & Scholarships

VATAT Doctoral Fellowship in AI & Data Science *2026 to 2029*

- National three-year fellowship from the Israeli Council for Higher Education's Planning and Budgeting Committee (VATAT); one of up to 20 awarded annually across all universities.

TAD Excellence Fellowship for Doctoral Students *2026 to 2029*

- Three-year excellence fellowship awarded by Tel Aviv University's Center for AI & Data Science (TAD).

Adi Lautman Interdisciplinary Program for Outstanding Students *2022 to 2026*

- Full tuition scholarship throughout undergraduate and graduate studies.

Experience

Graduate Researcher (*Advisor: Mor Geva*) *Sep 2024 to present*
Tel-Aviv University

- Published research on improvements to large-scale automated **feature interpretability pipelines**, and **machine unlearning**.
- Working on understanding and controlling **reasoning** in LLMs.

AI Researcher *Feb 2026 to present*
AAI

- Working on designing expert AI systems.

Research Fellow *Jun 2026 to Aug 2026*
Cambridge Boston Alignment Initiative (CBAI)

Research Intern (*Supervisor: Atticus Geiger*) *Jun to Sep 2025*
Pr(Ai)^{2}R Group

Senior Software Engineer *Mar 2021 to Feb 2026*
Laminar Security / Rubrik

- Joined the startup at its inception, spearheading the development of front-end, back-end, and agent-based systems from scratch, including a document sensitivity classification engine.
- Led technical research and implemented solutions for extracting decrypted data from encrypted cloud traffic.

Senior Developer & Researcher *Mar 2016 to Mar 2021*
Stealth

- Carried out months-long solo research projects into esoteric and opaque technologies that have little or no publicly available documentation, culminating in the development of technical solutions.

- Led through to completion highly complex, high-risk projects involving multiple teams.

Software Developer *Aug 2015 to Mar 2016*
Checkpoint Software Technologies

- Contributed to the development of a log aggregator and analyzer product tailored for large enterprises.

Publications

Faithfulness Metrics Don't Measure Faithfulness: A Meta-Evaluation with Ground Truth *May 2026*

Yoav Gur-Arieh, Ana Marasović, Mor Geva

Accepted to NeurIPS 2026
Oral presentation at NEMI 2026

Disentangling MLP Neuron Weights in Vocabulary Space *Apr 2026*

Asaf Avrahamy, **Yoav Gur-Arieh**, Mor Geva

Accepted to COLM 2026

Mixing Mechanisms: How Language Models Retrieve Bound Entities In-Context *Oct 2025*

Yoav Gur-Arieh, Mor Geva, Atticus Geiger

Accepted to ICLR 2026

LMEnt: A Suite for Analyzing Knowledge in Language Models from Pretraining Data to Representations *Sep 2025*

Daniela Gottesman, Alon Gilae-Dotan, Ido Cohen, **Yoav Gur-Arieh**, Marius Mosbach, Ori Yoran, Mor Geva

Accepted to TACL

Precise In-Parameter Concept Erasure in Large Language Models *May 2025*

Yoav Gur-Arieh, Clara Suslik, Yihuai Hong, Fazl Barez, Mor Geva

Accepted to EMNLP Main 2025

Enhancing Automated Interpretability with Output-Centric Feature Descriptions *Jan 2025*

Yoav Gur-Arieh, Roy Mayan, Chen Agassy, Atticus Geiger, Mor Geva

Accepted to ACL Main 2025

Invited Talks

Technion, NLP Group – *Evaluating Chain-of-Thought Faithfulness in LLMs* *Aug 2026*

Transluce – *Mixing Mechanisms: How LMs Use Pointers to Bind and Retrieve Entities* *Aug 2026*

Harvard University, Kempner Institute PRISM Group – *Evaluating Chain-of-Thought Faithfulness in LLMs* *Aug 2026*

Northeastern University, Bau Lab – *Evaluating Chain-of-Thought Faithfulness in LLMs* *Jul 2026*

Hebrew University, NLP Group – *Mixing Mechanisms: How LMs Use Pointers to Bind and Retrieve Entities* *Jan 2026*

Max Planck Institute for Security and Privacy – *From Description to Erasure: Feature-Based Control of LLMs* *Sep 2025*

Technologies

Languages: Python, C, Golang, C#, Java, JavaScript

Technologies: PyTorch, HF Transformers, TransformerLens, SAELens, eBPF, Linux Internals, Cybersecurity

Language Proficiency

English, Hebrew: Native
